Projects

WEBMASH

link:- https://gagansinghmsitece.github.io/React-Blog-Frontend/

It is a blog whose front end is created using ReactJs(source code available on my github), React-icons, React-router and back end with Django.

PORTFOLIO

Link:-https://gagansinghmsit.pythonanywhere.com/

This is my online portfolio which consist of dynamic pages insteadof staticpages(unlike other portfolios) ans is responsive on almost all devices while itsbackend is built on Django with python as programming language.

SAPORA TASKS

link:-https://play.google.com/store/app/details?id=me.sapora.todolist.tasks

Sapora Tasks is created with front-end technologies like HTML and cordova which seamlessly blend together to deliver a great user experience.
It is a app.
Plan your day using Sapora tasks by creating lists which will help you to plan your day,set your tasks and track your goals.

S PDF READER - AD-FREE PDF VIEWER

Link:- https://play.google.com/store/apps/details?id=me.sapora.pdfreader.pdf.reader

S Pdf Reader combines open source PDF-JS with HTML to open PDF files in your smartphone. It is the world's first accountless and ad-free PDF viewer.

BLOG

link:- https://gagansinghmsitece.github.io

The blog is developed using Hugo and hosted via github pages where posts can be created in markdown. It is static in nature which accounts for its low load time.
